

JAN SCHOLTEN  
*the periodic system*  
DUBLIN 2007

---

**DON'T MISS THIS UNIQUE OPPORTUNITY TO STUDY  
THE MINERAL KINGDOM  
IN ITS ENTIRETY**

Jan Scholten's work with the periodic system began 15 years ago with group analysis, then followed the element theory which uses the periodic table of elements to classify the remedies of the mineral kingdom creating concepts which apply to each series and stage within the periodic table. Supported by a large number of clinical cases and provings, he will show the effectiveness of this approach.

In this three day seminar Jan will clarify the entire periodic system bringing together its development over the last 20 years, differentiating the 18 stages and 7 series and enabling every practitioner to use this method with confidence and ease. The themes of the series and stages can be applied to all cases including those from the animal and plant families.

With frankness and honesty Jan will demonstrate the development of his ideas and the simplicity of this system, from the very beginning to his most recent work, covering pathology from eczema to auto-immune disease. Jan's dedication to finding truly curative remedies is impressive, his understanding of each individual, their life story and the way he translates this in his teaching makes the challenge a little easier for every homeopath.

Equally valuable for those who are new to this system and experienced homeopaths. Jan's seminars provoke interactive debate and a forum for homeopathic discussion.

**:: NOV 23, 24 & 25 - 2007 ::**

**COME AND JOIN THE CRAIG**
