

PROVING SEMINAR WITH JAN SCHOLTEN

Welcome friends to our second proving seminar.

After the success of last year's seminar in Kenya, we are this year venturing off to South Africa to sample the beauty of the flora of this country. Once again this seminar is to explore and discover new and interesting insights into plants and their habitat.

Facilitated by Jan Scholten.

THE PROVINGS

To feel drawn to a plant is a magical moment, this is where the proving begins. To touch and experience the plants in their natural habitat gives such accuracy to the picture. The plant of choice is prepared by Robert Muentz from Remedia, who excelled in this role last year. The provings are conducted in small groups each being facilitated by Jan Scholten.

At the end of each day we gather together and share each proving experience. Jan brings together the work from his tireless enthusiasm of the plants and the interrelated families. It is both professionally inspiring and personally healing.

We hope you find your true essence.

You may come as a participant or just experience the beauty of the vegetation in this glorious country. We are also close to Rhodes University Botanical gardens for its annual flower festival.

THE VENUE

Eastern Cape South Africa, Kenton on Sea.

One of the most picturesque places in the country, Kenton on sea lies between the mouths of the rivers Boesmans and Kariega so hedged on each side by rivers and the Indian ocean. The area offers the nature lover and eco tourist alike a place to relax and unwind in a safe environment. Both tidal rivers have abundant fish and bird life and are safe for swimming, also whale families make their home in Kenton and visit every year . The Kariega beach was voted the best beach in

South Africa in 2000 and you would be hard pushed to find such serenity and beauty elsewhere. River cruises up the Bushman's River are a must on the floating restaurant.

Only 10 - 15 mins. inland provides those wanting the true African game experience the opportunity of staying at a number of game reserves. All are malaria free areas.

DATE AND PRICES

1st - 7th October 2012

Seminar fee € 350

Accommodation per person per day €40. (including breakfast and dinner).

Places limited so please confirm. Thank you and we look forward to this wonderful time.
